# Burpee's Allhead Early Cabbage.®

The BEST Early Summer Cabbage—the EARLIEST Large Flat-head.

**Burpee's Allhead** is the earliest of all large Cabbage, and considerably larger than any other early summer Cabbage that is equally as early. The deep flat heads are remarkably solid, and the most uniform in color, form, and size of any variety. As tenderness is the result of rapid growth, it surpasses all others in this respect. The hard heads grow so free from spreading leaves that fully one thousand more heads than usual with large cabbage, can be obtained to the acre. It is really an **all-the-year-round Cabbage**,—being equally good for winter,—see remarks at bottom of page. It is the *most thoroughbred* of all American Cabbages.

**Burpee's Allhead** has been developed by long-continued careful selection. Prior to introduction twelve years ago, we paid a cash bonus of one thousand dollars for its control; therefore, to be sure to obtain the true seed of selected strain grown direct from the original stock, you should order either direct from us or from those who procure their supplies from us.

Wholesale, \$1.50 per lb.; 10 lbs. or more at \$1.40 per lb.

The illustration below was accurately engraved from a few heads in the foreground of a photograph of one of our fields. It shows the *uniformity* of **Burpee's ALLHEAD**, just as it grows in the field.

C. L. ALLEN, the well-known writer and grower of Queens County, N. Y., after reading our description of this Cabbage, wrote:—"I would say that in all my experience in the cultivation of Cabbage I have never seen a variety that *possessed so many good qualities as this*, neither have I seen a field of Cabbage that contained so few objectionable plants as the one being grown for you. Your claims for **Burpee's ALLHEAD Early** seem very high, but after a careful inspection of the crop *I cannot question one of the points you claim.*"

**Allhead Early** is undoubtedly the best **second-early Cabbage**—and we *know* all varieties. We regret that it is now sold under a number of names by other houses, such as *Faultless Early, Solid South, Eclipse*, etc. If planters everywhere only knew the excellence of **Burpee's ALLHEAD Early Cabbage**, even our large supply of seed would not suffice to meet the demand. *It is undoubtedly altogether unequaled as an early summer Cabbage, and is fully as good for winter use, being really an all-the-year-round Cabbage.*

Our high opinion of this grand new Cabbage was shown at first by the fact that in addition to a two years' contract for seven thousand pounds of seed, we paid a cash bonus of one thousand dollars for the exclusive right of its name and introduction. Certainly no such price was ever paid for a Cabbage before or since. Our claims as to the merits of the **ALLHEAD** have been fully sustained by reports from planters everywhere,—of which a number have been published in previous catalogues. The small illustration herewith of a single head was engraved accurately from a photograph.

**Burpee's Allhead**, introduced twelve years ago, is now recognized as the **Best early flat-head Cabbage**. While meant principally for summer and early fall, yet if sown about the 20th of July and put away when two-thirds grown (put head up,—not down), the heads will come out as "*hard as bullets*" in the spring. There is nothing better for winter cabbage. Excepting only the Savoy, **ALLHEAD is the best flavored of all cabbages.**

PHILADELPHIA, October 28, 1902.

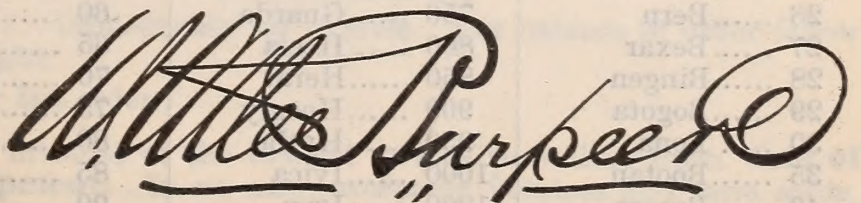

### ***To the Trade:***

This Preliminary Price List is issued earlier than last year, in order to give our wholesale customers information as to present values of seed and an opportunity to cover their requirements before we are obliged to report "*sold out*" on some very scarce varieties.

Many merchants who have not learned as yet of the unprecedented shortages, may be surprised at the advanced prices we are compelled to charge on certain lines. Of all Cucumbers and Musk Melons, many Watermelons and Squashes, most varieties of Peas and Wax Beans, and many Tomatoes, there is not half enough seed in sight to supply the normal requirements. With these, it will not be a question of demand, but altogether of supply. We shall endeavor, as far as possible, to protect our regular customers, but must **urge early orders**,—prices will certainly have an upward tendency as the fearful shortages become more generally realized. Cabbage, Carrots, and Radish, which were so short last season, are fortunately now in full supply, and we are prepared to make special offers in large lots.

**We employ no travelers**, but are always pleased to reply promptly to inquiries with **firm offers**, by mail or telegram. From the fact that so many of our Vine Seeds, Tomatoes, Beans, and Peas, are *grown in the East*, we are probably in a better position than most houses to take care of general orders from merchants. With the correspondingly higher prices to private planters and market gardeners, together with the eager demand, seed dealers who are fortunate enough to get a supply should realize greater net profits in 1903 than for years past.

Very truly yours,

CITY WAREHOUSE:

475 and 477 North Fifth St.,  
476 and 478 York Avenue.

PHILADELPHIA, PA.

SEED GARDENS and Trial Grounds at FORDHOOK FARMS, Bucks County, Pa.

## Telegraphic Cipher (or Cable Code)

## FOR WEIGHTS AND MEASURES.

The telegraphic cipher word for quantities must always precede the cipher words for seed, but if the same quantity of several varieties is ordered, the cipher word meaning that quantity need be placed only before the first. For example :

**Arad Navy, Purity, Benares, Calliope, Chalice, Malmo Balcony**, would mean, ship at once, cheapest route, ten pounds each **NAVY BLUE** and **SADIE BURPEE SWEET PEAS** (white-seeded), twenty-five pounds each **BURPEE'S ALLHEAD EARLY CABBAGE** and **OXHEART CARROT**, and ten bushels **BURPEE'S STRINGLESS GREEN-POD BEANS**.

Our customers will find this a very inexpensive way of wiring their orders, but we must caution them that care be taken in writing out the messages, as we cannot hold ourselves responsible for errors arising from incomplete messages or incorrect translation.

**IMPORTANT.**—This telegraphic cipher must be used **ONLY** on orders by telegraph or cable, and never in written orders sent by mail.

**Our Cable Address is BURPEE, Philadelphia.**

# BURPEE, Philadelphia,

## Is Our Registered Cable Address.

All foreign customers are requested to advise us of their **shortest cable address**. Customers in America who wish to telegraph will also, occasionally, find it useful to use the following additional code.  Please note the **code=words** below that would be used in our **reply**, either by cable or telegram.

### FOR OFFERS AND INQUIRIES.

CODE-WORD.	TRANSLATION.
<i>Daubling</i> .....	Telegraph your lowest prices for .....
<i>Dean</i> .....	Mail your lowest prices for .....
<i>Decoy</i> .....	Mail your lowest prices for ....., and send samples.
<i>Defend</i> .....	Telegraph when goods can be shipped.
<i>Defender</i> .....	Advise immediately by mail how soon goods will be shipped.
<i>Deform</i> .....	Can you offer for acceptance by mail ..... ?
<i>Deject</i> .....	Can you offer any ..... ? If so, telegraph prices.
<i>Delude</i> .....	Can you offer any ..... ? If so, mail prices.
<i>Derange</i> .....	Telegraph quantities you can offer of following, with prices.
<i>Descend</i> .....	State by letter quantities you can offer of following, with prices.

### Code-words that will be used in OUR ANSWERS.

<i>Dab</i> .....	{ In reply to your telegram, we quote for immediate acceptance upon our usual terms for special quotations the varieties named below, provided they are unsold upon receipt of your order.
<i>Dacite</i> .....	We accept your order for .....
<i>Dagger</i> .....	We accept your order for ....., and shall ship at once.
<i>Dainty</i> .....	We accept your order for ....., and shall ship as directed.
<i>Damsel</i> .....	We offer you for immediate acceptance, subject to being unsold.
<i>Dance</i> .....	We accept your offer and shall ship as directed.
<i>Dapper</i> .....	Cannot accept your order for .....
<i>Dapple</i> .....	{ Part of your order went forward by freight on ..... expect to ship balance .....
<i>Darby</i> .....	{ Part of your order went forward by express on ..... expect to ship balance .....
<i>Dardanus</i> .....	Please repeat your message, it is not clear.

### Code for positive ORDERS.

<i>Dargie</i> .....	Send immediately by <i>express</i> following seeds at catalogue prices.
<i>Darken</i> .....	Send immediately by <i>freight</i> following seeds at catalogue prices.
<i>Darnel</i> .....	Send immediately by <i>mail</i> following seeds at catalogue prices.
<i>Dare</i> .....	Send immediately the following by <i>freight</i> , per special quotations.
<i>Dared</i> .....	Send immediately by <i>express</i> the following, per special quotations.
<i>Darling</i> .....	Send immediately by <i>mail</i> the following, per special quotations.
<i>Dasher</i> .....	{ Send at once following ..... ; let the other seeds follow as quickly as possible.
<i>Dashing</i> .....	{ Have you shipped our order? If not, increase if possible our order for ..... to ..... pounds (bushels).
<i>Datary</i> .....	{ Send ..... immediately by express. Let balance of order follow by freight.
<i>Dation</i> .....	Duplicate our last order.

**Foreign Orders** are invoiced at the **lowest prices** prevailing upon **date of shipment**. In no case (except on Potatoes and farm seeds, subject to fluctuations) will prices be charged higher than quoted herein, while in **case of decline** in any lines our foreign customers (who, of course, cannot be kept so well posted in the value of American seeds) will receive full advantage of any **lower prices** that we may be quoting. Our export trade is increasing every year, and dealers, even in the most distant countries, who intrust their orders to us, can rely upon the same close attention and equally the **most favorable prices** that we are making at the same time, for the same quality and quantity, to American seedsmen.

**Terms of Credit.**—To regular customers and well-known houses of established credit, all bills bought from this catalogue are due June 1st, without regard to date of purchase.

 Bills purchased **on special quotations**, made by letter, are due three months from date of invoice, or subject to a discount of one and a half per cent. for cash within ten days of date of invoice.

 Unknown correspondents desiring credit are requested to give satisfactory reference in Philadelphia or New York.

**Cash Discount.**—We allow a discount of **Five Per Cent.** on orders accompanied by a cash remittance, and also on all bills (at catalogue prices) paid within ten days from date of invoice.

**The Prices Quoted** are those ruling at this date. We expect to adhere to them until the issue of our January catalogue, except where important changes compel us to advance or reduce our prices, when we shall be governed by the market. **10 lbs. and more will be supplied at the rates per 100 lbs.;**  $\frac{1}{2}$  lb and  $\frac{1}{2}$  bush. at pound and bushel rates; but *smaller quantities will be charged at a higher rate.*

**NO CHARGE for Packing or Cartage.**—Bags and boxes are charged *at Cost.* After delivering to forwarders in **good order** (as shown by Bill of Lading) our responsibility ceases. **Insurance** will be effected only when so directed.

**SEALED PACKAGES.**—We make no charge for sealing **pounds, pecks, or bushels**, but, at the low bulk prices quoted therein, we shall charge for putting up in smaller sealed packages, when so ordered, as follows:

**In Ounces.**—One cent per ounce; 50 cts. per 100 ounces.

**In Quarter-Pounds, Pints, and Quarts.**—Two cents for each package.

**In Two-Quarts and Four-Quarts.**—A charge of three cents per package.

**BURPEE'S SEEDS** are sold in any quantity, but only under seal. They are always Genuine as dated,—if seal is unbroken.

## About Warranted Seeds.

There has been considerable discussion in the trade papers the last few years about warranted seeds, and several seedsmen have criticised the warranty which we have given always,—only to the amount actually paid for the seed. With other reputable seedsmen, who insist upon the usual “disclaimer,” we agree *in so far* that it would be little short of quackery to warrant any seeds invariably to produce good crops. Success is sometimes beyond human control. Under adverse conditions even the best seeds may fail.

We maintain, however, that a Seedsman should know thoroughly the seeds he sells, and after using every possible safeguard, in case of failure from any fault of the seed, should refund the price paid. Further responsibility than this it is impossible to assume. Such a guaranty, however, shows confidence on the part of the Seedsman that he is sending out only first-class seeds, and insures the careful co-operation of his employees.

It is necessary, of course, that samples be tested of every lot of seeds, not only for vitality (for even “weed seeds grow”), but also for genuineness and quality of strain. Our complete system of field trials at FORDHOOK FARMS (thousands repeated each season) is the most extensive in America, while with our constant watchfulness in filling orders at our city warehouse the chance of mistakes is reduced to the minimum. Should any mistake occur, however, as would be shown by comparison of samples of the same lot tested in our Trial Grounds, we are prompt to refund the price paid. While this does not compensate for any contingent loss, yet it proves that we have more than usual confidence in the thorough care constantly exercised by us in growing and selling

**The Best and Only the Best Seeds that Grow.**

# Burpee's Vegetable Seeds.

TEN POUNDS OR MORE WILL BE CHARGED AT 100-POUND RATES.

 **A Telegraphic Cipher (or Cable Code)** is attached to each variety, by which orders can be wired at little expense,—using also our code for weights and measures as given on pages 2 and 3. For example:

**Darken Pelew Balcony** would mean: Send immediately, by fast freight, forty bushels of BURPEE'S STRINGLESS GREEN-POD BEANS at catalogue price.

**Dargie Arad Cage** would mean: Send immediately, by express, ten pounds of best select JERSEY WAKEFIELD CABBAGE at catalogue price.

**Darnel Amoy Lantern** would mean: Send immediately, by mail, three pounds of seed of BIG BOSTON LETTUCE.

 **This list cancels all previous quotations.** Orders are binding only when accepted. On varieties which are in extremely short supply we shall refuse orders after we have sold quantities allowed for our wholesale trade.

 Those who depend on us each year for their supply of seeds are advised to place their orders early, before advances in prices become necessary.

Telegrams should be addressed,

**W. ATLEE BURPEE & CO., Philadelphia.**

**Our cable address is: BURPEE, Philadelphia.**

Mammoth Melting Sugar .....	<i>Pencil</i> .....	7 50	

**All our Peas** are hand-picked and of the best samples possible to produce in the past unfavorable season. We advise **early orders**, for while we shall try to **protect our customers**, prices are constantly advancing.

While on some varieties we can supply in quantity, it must be distinctly understood that on others, notably *Extra Earlies* (excepting *Alaskas*), both *smooth* and *wrinkled*, we will decline large orders, unless accompanied by orders for other seeds, of which there is not such "a fearful scarcity."

## PEPPER,—Small and Hot.

	Per lb.	Per 100 lbs.
Bird's-Eye, or Creole.....	<i>Pennant</i> .....	\$1 50

Dwarf GOLDEN CHAMPION (Burpee). <i>Trick</i> .....	1 75	165 00
Golden Queen (Sunrise) .....	<i>Trident</i> .....	1 50

By most careful continued selection we are enabled to offer strains of Tomato Seed which produce uniformly smooth fruits, of the most solidly fleshy character and fine quality. These strains have been developed, however, at the expense of the *quantity* of seed produced, and the price of this high-grade seed is necessarily higher than that at which inferior strains can be sold.

## TOMATO,—Small-Fruited Varieties.

	Tel. Cipher.	Per lb.

## CHOICEST FLOWER SEEDS.

We make a specialty of the **Choicest Flower Seeds** which we grow extensively, both at FORDHOOK FARMS and with our private growers in America. We have **extra fine stocks**, particularly of ASTERS,—BALSAMS,—BEGONIAS,—COLEUS,—COSMOS,—GLOXINIAS,—Giant Hybrid HELIOTROPE,—Tall and Dwarf NASTURTIUMS,—Largest-Flowering PETUNIAS,—PHLOX DRUMMONDII,—SALVIA SPLENDENS, and VERBENA.  We shall be pleased to quote **Special Prices** upon receipt of list of your requirements, stating varieties and quantities. Or you can send **an open order**, in full confidence that prices will be *very moderate* for quality of seed.

# Complete List of all Known Tall SWEET PEAS.

 Special Low Prices. 

We are acknowledged as **AMERICAN HEADQUARTERS** for Sweet Peas.

 We should refer to our Retail Catalogue for full descriptions of **NOVELTIES** not specially described herein, and should suggest that with the present widespread interest in Sweet Peas it will pay seedsmen generally to offer more of the **NEW SORTS**, as the margin of profit—between retail and these special prices—is greater than on standard varieties.

 We are not bound by these prices after December, and for quantities only so far as engaged. When our general Wholesale Catalogue is issued in January, probably many varieties will be advanced.

## DOUBLE SWEET PEAS. From most carefully selected stock seed, saved only from the best plants bearing double flowers, we offer the following varieties:

Apple Blossom,  
Butterfly,  
Duke of Clarence,

White,  
Waverly,  
Boreatton,

Captain of the Blues,  
Bride of Niagara,

Senator,  
Splendor.

Each of the above DOUBLE SWEET PEAS, 35 cts. per lb.

Ten Mixed DOUBLE SWEET PEAS (Cable word—*Xerxes*), 30 cts. per lb.; \$27.50 per 100 lbs.

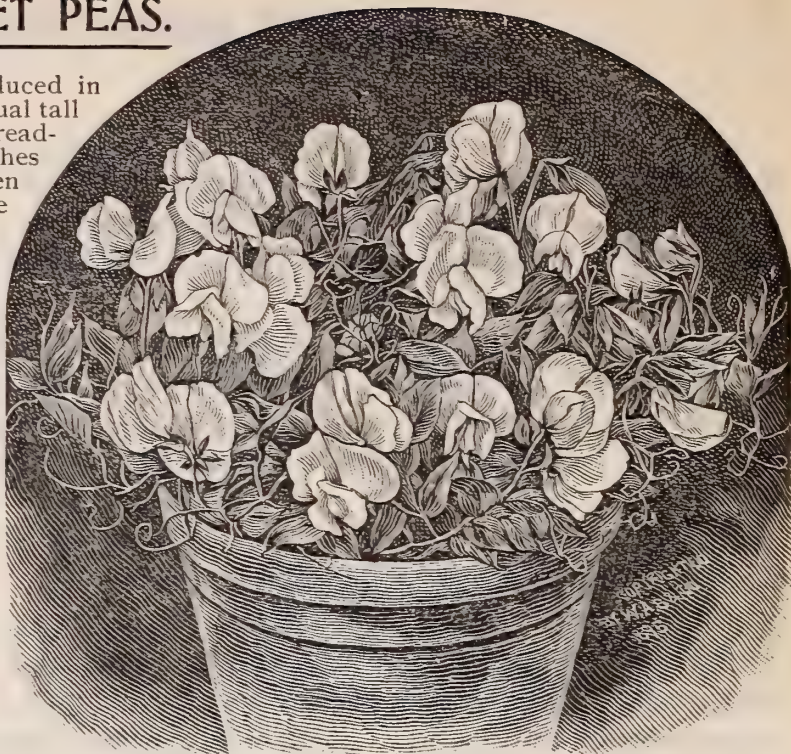

## Burpee's Dwarf CUPID SWEET PEAS.

This new race of Sweet Peas, first introduced in 1895, differs as widely as possible from the usual tall vine-like growth, being of low very compact-spreading form. Plants are seldom more than six inches in height and form a dense mat of richest green foliage fifteen inches or more in diameter. The flowers are *fully equal in size* to those of the tall-growing varieties, but are placed closely together, generally three or four at the top of a stout stiff stem, seemingly poised just above the surface of the dark-green foliage. The close-spreading growth lying on the surface of the soil serves to keep the latter cool and moist, protecting it from the burning rays of the sun. By reason of this close dense growth, these Cupid varieties have not always proved so successful when planted

where the tall varieties grow most luxuriantly; the close growth of foliage does not dry out so quickly after heavy rains as the tall sorts, which are supported on brush and exposed to the drying influence of the air. For light dry soils, however, where the tall sorts quickly dry up or are injured by blight and insects during severe hot weather, CUPID SWEET PEAS give the greatest satisfaction. Protracted dry weather induces them to grow with the greatest vigor and flower most freely. The black-seeded varieties are fully as hardy and vigorous as those of the tall-growing sorts, with similar seed, and can be planted successfully quite early in spring when the trees are starting out in leaf. The white-seeded White and Primrose Cupids, however, will give best results if planted when the weather has become warm enough to plant corn, and can be most successfully germinated by pursuing Mr. Hutchins' new method described in our leaflet, "HOW TO GROW SWEET PEAS," which is sent **free if requested on the order.** In dry locations, the seed may be sown rather thickly in a drill, as with other sorts, and the plants allowed to grow in a close compact row, forming a beautiful ribbon or border of dark rich green, thickly starred with the brightest blossoms. For heavier moist soils we recommend planting in slightly elevated beds and having the plants stand ten inches or more apart.

NEW DWARF SWEET PEA,—“CUPID.” FLOWERS WHITE.

*The above engraving, reduced in size, is an exact reproduction of an illustration in THE GARDENER'S CHRONICLE, London, June 29, 1895, of one of the pot-plants exhibited at the Royal Horticultural Society, June 25, 1895, where by unanimous vote we received an Award of Merit for CUPID,—the highest indorsement possible.*

**ALICE ECKFORD CUPID.** Standard is silvery white with faint stripe of silvery rose in center fold, with shadings of soft rosy pink at the base; wings white. **Per lb. 35 cts.; 10 lbs. at 30 cts. per lb.**

**APPLE BLOSSOM CUPID.** The flowers are of *grand large size*, beautifully hooded and borne four on a stem. The standard is very large and broad, slightly pointed with edges well rolled, deeply suffused and veined with deep rose on a silvery ground; wings are shaded in the center with soft rose. **Per lb. 65 cts.; 10 lbs. at 60 cts. per lb.**

**BOREATTON CUPID.** Standard a rich wine-brown, with deeper veinings and a satin-like finish. Wings lie closely to the semi-erect keel, deep mauve in shading, underlaid with rosy purple. **Per lb. 40 cts.; 10 lbs. at 35 cts. per lb.**

**BURPEE'S BEAUTY CUPID.** The standard is of unusual breadth, with heavily rolled edges, giving a deeply hooded effect; wings broad and erect. Standard rich rose-pink, shading to nearly white at the edges and slightly striped with carmine at the base. Wings suffused rosy carmine, deepening at the edges. **Per lb. 35 cts.; 10 lbs. at 30 cts. per lb.**

**CAPTAIN OF THE BLUES CUPID.** The standard is of a reddish-purple tint heavily suffused with violet; wings very large, of a rich violet-purple,—*approaching deep blue.* As seen in contrast to the rich dark-green foliage, the mass of flowers has quite an effect of rich *deep blue.* **Per lb. 75 cts.; 10 lbs. at 70 cts. per lb.**

**CHAMBERLAIN CUPID.** This is truly entitled to be called “*Giant-flowered.*” The gigantic flowers are of perfect form, fine substance, borne in clusters upon stiff stems and are beautifully striped rosy pink upon white ground. **Per lb. \$1.10; 10 lbs. at \$1.00 per lb.**

**COUNTESS OF RADNOR CUPID.** Flowers are of immense size, even larger than those of the tall Countess, and are borne in the greatest profusion, coming three and four to a stem. **Per lb. 45 cts.; 10 lbs. at 40 cts. per lb.**

**FIREFLY CUPID.** The large flowers have the dazzling scarlet effect of *Firefly* and seem even more intense in glowing color as contrasted with the close dark-green foliage. **Per lb. 45 cts.; 10 lbs. at 40 cts. per lb.**

**PINK CUPID.** This grand variety has the bright pink-and-white flowers of the *Blanche Ferry* type in the tall or running varieties, of which it is a distinct sport. The standard is of a clear bright rose-pink. The wings are lightly suffused with faint rose, but so slightly that they seem pure white in contrast to the bright glowing pink of the standard. **Per lb. 35 cts.; 10 lbs. at 30 cts. per lb.**

**PRIMROSE CUPID.** The flowers are self-colored in a rich creamy or primrose tint, identical with those of the tall *Primrose.* **Per lb. 35 cts.; 10 lbs. at 30 cts. per lb.**

**ROYALTY CUPID.** This resembles the tall *Royal Rose*, one of the finest self-colored pinks, but the broad standard makes an even *larger flower*, while the coloring is considerably *deeper and richer in tone*,—hence the new name “*ROYALTY.*” The flowers are extra large, well hooded, and of true grandiflora type. **Per lb. 75 cts.; 10 lbs. at 70 cts. per lb.**

**WHITE CUPID.** The first of this new “*CUPID*” dwarf race. Flowers are borne three on a stout stiff stem and of the clearest snowy whiteness. **Per lb. 30 cts.; 10 lbs. at 25 cts. per lb.**

## BURPEE'S FIFTY CUPIDS, in Mixture.

This Special Mixture includes ten of the above and also *forty other varieties* which have not yet been separately introduced,—the different colors being blended in suitable proportions. This New Mixture alone contains most of the shades in the Tall Sweet Peas. The flowers range in color from pure white and light pink to dark red and from light lavender to deep purple, while there are several attractive and unnamed striped varieties. We have grown a large crop, and are able to sell at so moderate a price that we are sure this superb and showy mixture will make thousands of new friends for our unique DWARF CUPID SWEET PEAS. **Per lb. 75 cts.; 10 lbs. at 70 cts.; 25 lbs. at 65 cts. per lb.**

**Burpee's Cupid,—“AMERICA.”** The large flowers are produced in threes at the top of a stiff stem, and are extremely bright and showy in contrast with the rich dark-green foliage. The standard and wings are very broad and spreading, displaying effectively the bright blood-red stripings on silvery-white ground. The color is most showy and pleasing. Per lb. 90 cts.

**Burpee's Cupid,—“HER MAJESTY.”** A very pleasing shade of deep rosy crimson, a solid bed or row of this variety being intensely glowing in the warm sunshine. The color is one of the lighter and softer shades of bright glowing red. The flowers are the same in form and coloring as those of the tall *Her Majesty* and are even larger in size, the standard being much broader at the base. They are self-colored in a soft shade of rosy crimson, slightly deeper in the wings than in standard. Per lb. \$1.10.

**Burpee's Cupid,—“LOTTIE ECKFORD.”** This beautiful blending of most attractive tints will be a great addition to the list of Cupid Sweet Peas, when grown either as a bedding or pot-plant as well as for furnishing small bouquets, etc. The flowers are of large size, with broad slightly rolled standard, and the broad wings widely spreading. Both standard and wings are clear silvery white, outlined or edged with rich purple-lavender with fainter shadings of the same color frequently shading the inner portions. Per lb. \$1.10.

**BURPEE'S BUSH SWEET PEAS.** This is a new race of entirely distinct growth, first introduced by us in 1899.

It has proved very satisfactory in growth and freedom of flower, particularly in light warm soils. The plants are erect, fifteen to eighteen inches high when in full flower, but branching freely so that the close bushes are frequently fifteen inches and more in diameter, composed of short erect branches with abundant light-green foliage. The tendrils at ends of the leaves clasp themselves closely to the adjoining branches, so that the whole plant is held quite erect though sufficiently open to admit of a freer circulation of air than in the low compact form of the Cupid type. The flowers, while not so large, are of as fine form and beautiful coloring as the Tall varieties, and are quite distinct from the Cupid type, it being borne on long slender stems. As the stems of flowers can be cut with some of the neat attractive foliage, they are most desirable for bunching in bouquets and for floral decorations.

**BURPEE'S BUSH GRAY FRIAR.** The first variety of this most distinct type. It is identical in coloring with our beautiful *Gray Friar*. The standard is large, stiffly erect, and broadly spreading; wings wide and well spread, edges slightly rolled. The coloring, in suffused shadings and watered veinings, is of lavender-purple on a silvery-white ground. Per lb. 35 cts.

**BURPEE'S BUSH MONARCH.** Fine large flowers, generally three in a cluster at top of long stiff stems. The rich dark coloring of the flowers contrasts most admirably with the light-green foliage. Standard large and wide, well spread, and of a deep claret or wine-brown; wings heavily rolled, rich purple. Per lb. 45 cts.

**BURPEE'S BUSH BLANCHE FERRY.**

Plants of true bush growth, with a profusion of fine large flowers of the ever-popular coloring, pink-and-white, as seen in tall *Blanche Ferry*, *Burpee's Earliest of All*, and *Pink Cupid*. The plants grow only fifteen inches in height, come into flower early, and are almost completely hidden by the cloud of beautiful blossoms which come in threes on a long stem. The standard is a soft pink and the wings white, occasionally faintly suffused with rose-pink. Per lb. 65 cts.

BURPEE'S NEW BUSH SWEET PEA.

**Burpee's Bush Sweet Pea,—“BLANCHE BURPEE.”** The plants are of dwarf compact growth, but erect and freely branched, being fifteen to eighteen inches high when in full flower and frequently of equal diameter. The curling tendrils at the ends of the leaves twine closely about adjoining branches, so that the whole is interlaced together and self-supporting. The flowers are of the pure paper-whiteness, fine bold form, and firm lasting substance as in the famous tall *Eckford's Blanche Burpee*, but average about two-thirds the size. They are produced in pairs at the top of stiff, slender stems six inches long, and make excellent cut-flowers for bunching in bouquets, etc. Per lb. \$1.25.

**Bush,—“HER MAJESTY.”** Flowers of good size and finest form, beautifully hooded, but not quite so large as those of the tall *Her Majesty*. They are usually produced in pairs on a slender stem six inches in length. The color is a rosy crimson, both in the standard and wings, very bright and soft in tint, a truly charming shade. Typical bush growth in all respects. Per lb. \$1.25.

**Bush,—“PRIMA DONNA.”** The “PRIMA DONNA” is a decided acquisition to this grand new race of Sweet Peas, in which the plants grow only fifteen to eighteen inches high when in full flower and which, while branching freely, are stiffly erect and self-supporting. Like those of the tall-growing *Prima Donna*, the flowers are of a beautiful soft-pink tint and self-colored,—the most exquisite shade of flesh-pink, a true peach blossom tint. Standard slightly folded and the upper edges heavily rolled; wings nearly erect and well spread, making a fine hooded effect. Per lb. \$1.10.

**Bush,—“SENATOR.”** This is a perfect reproduction in flower of the tall-growing *Senator*, one of the finest striped varieties, combined with the very distinct bush type of growth, which, while well branched and spreading, is only fifteen to eighteen inches high when in full flower. Standard and wings are silvery gray, heavily striped with brownish claret, changing to a violet-purple as flowers remain open. Per lb. 90 cts.

# New Cabbage,—Burpee's "EARLY STONEHEAD."

Introduced by us last year, EARLY STONEHEAD has already made a host of friends. The large solid head is of very distinct growth and appearance. It is *exceptionally robust* and *hardy*, with ample spreading foliage, is well adapted both for an early summer crop, and from later planting for fall and winter. It is also specially adapted to fall planting in the Southern States for an early spring market; the heads, each "*solid as a stone*," being particularly valuable in shipping to the northern markets.

In season it is slightly later than *Burpee's Allhead Early*, but the heads grow to a larger size and will stand quite a long time before bursting. The outer leaves are large and spreading, so that the plants should be set two feet apart in the row. The plants are short-stemmed, the saucer-like circle of large grayish leaves resting on the soil.

The heads are quite large, averaging ten inches and over in diameter, broad but distinctly *rounded at the top*. The leaves are very tightly folded, ensuring heads of the *greatest possible solidity*. The leaves composing the heads are of heavier substance than in *Allhead*, but are finely blanching and of crisp sweet flavor.

Its great solidity makes it most desirable for slicing for slaw, sourkroust, etc. **\$3.00 per lb.**

# New Egg Plant,—Burpee's "BLACK BEAUTY."

During the twenty-seven years in which we have been continuously engaged in the seed business this is the first distinct New Egg Plant of any real importance that has been introduced,—and BURPEE'S "BLACK BEAUTY" is a novelty of most remarkable merit. It is valuable alike to the private planter and the extensive grower for market. Our fields of BLACK BEAUTY the past two seasons produced fruits *fully as large* that were ready for use **ten days to two weeks earlier** than the *New York Improved Purple*.

For the home garden and northern locations earliness is equally as desirable as for the market gardener, and when combined with large size, fine flavor, and most attractive appearance, our friends will readily see that this new "BLACK BEAUTY" is well worthy of a place among the "trade-mark" novelties of which

we are so justly proud. The plants branch freely near the ground, and grow in broad, well-rounded bushes. The fruits are broad and thick, of most attractive form, as shown in the illustration. The skin is a **rich lustrous purplish black**,—the *satin gloss and rich coloring adding greatly to the beauty of the fruit*. This intensely brilliant coloring is *uniform over the whole fruit* and does not fade or change to a lighter color at the blossom end. The calyx, which attaches the fruit to the stem is bright green, contrasting finely with the dark satin skin of the fruit, and is *entirely free from spines or thorns*.

The fruits set most freely and are ready to market early, so that the entire crop can be gathered before there is any danger of frost, while of the *New York Improved Purple* many fruits do not reach full size before they are destroyed by frost. We advise every gardener to make a thorough trial of this grand novelty. We are sure that truckers generally will make their main planting with this variety as soon as they realize its value, both for earliness and extreme attractive appearance.

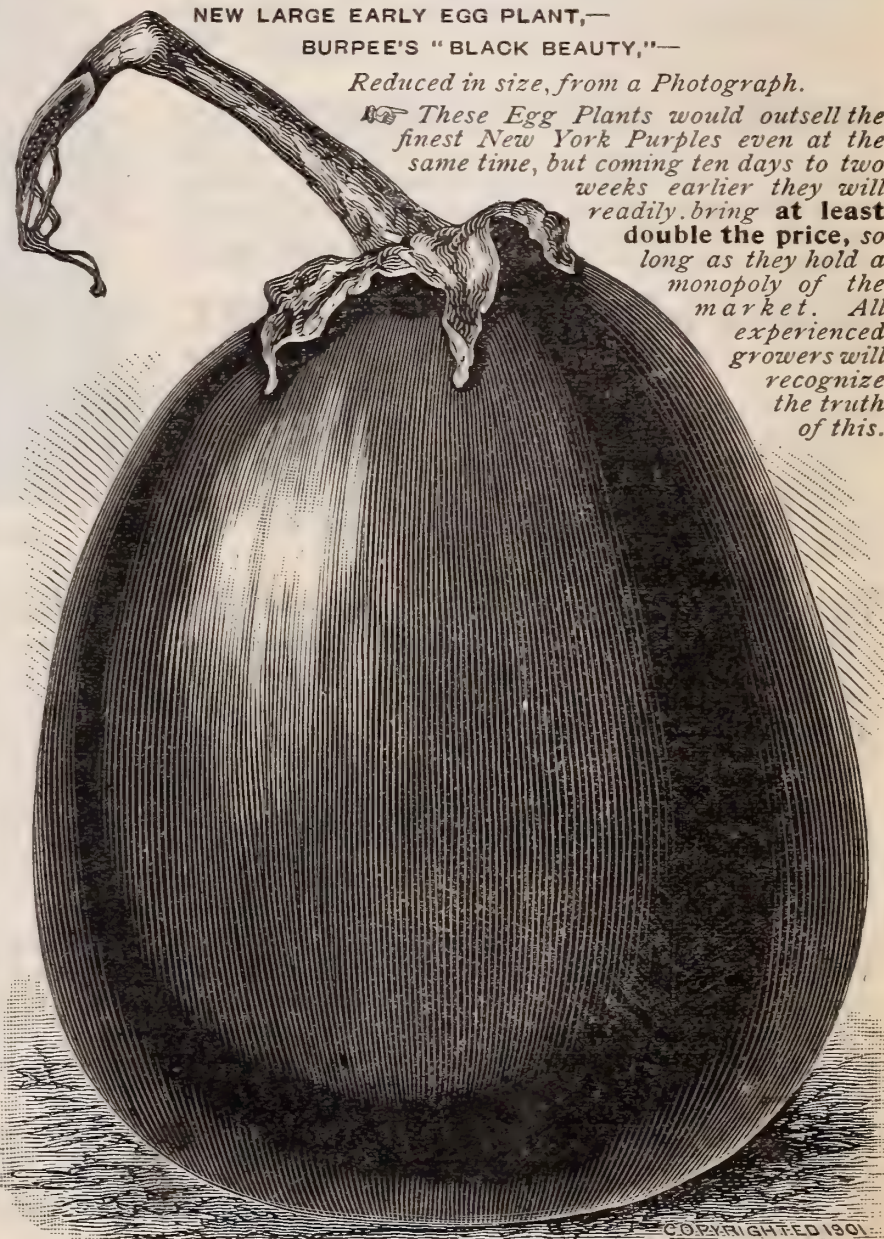

**Per lb. \$6.00; 10 lbs. at \$5.50 per lb.**

NEW LARGE EARLY EGG PLANT,—

BURPEE'S "BLACK BEAUTY,"—

*Reduced in size, from a Photograph.*

These Egg Plants would outsell the finest New York Purples even at the same time, but coming ten days to two weeks earlier they will readily bring **at least double the price**, so long as they hold a monopoly of the market. All experienced growers will recognize the truth of this.

## Burpee's New Extra Early AUSTRALIAN YELLOW GLOBE ONION

Five years ago one of our correspondents in Melbourne, Australia, reading the description of our *New Australian Brown Onion* in THE FARM ANNUAL, sent us for trial a sample of this fine onion, which he said was equally valued in that country. From the small crop of seed grown by us in this country we sent out samples to a number of our customers for advance trial during 1900. The reports received, as well as repeated trials made at FORDHOOK FARMS, show that it is a fit companion to the *Australian Brown*, first introduced by us in 1897, and already so famous as the earliest and longest-keeping onion in cultivation.

The bulbs of this NEW AUSTRALIAN YELLOW GLOBE are globe-shaped,—see illustration from a photograph. The skin is a light brownish yellow, similar to the *Globe Danvers*, but a little lighter, while the bulbs are slightly larger. From their solidity they are heavier, a bushel weighing several pounds more than a bushel of American varieties,—an important feature where bulbs are sold by weight. An average onion measures about three inches in diameter each way, weighing about seven ounces. The onions are thin-necked and ripen evenly in all soils; the plants do not make any second growth. The flesh is pure white, very solid, and exceptionally mild in flavor. As the plants grow quickly, the bulbs mature *extra early*, and this in connection with their *exceptional keeping qualities* makes them profitable to plant for market. The AUSTRALIAN YELLOW GLOBE is truly remarkable in productiveness. Two customers, in competition for our prizes, reported a yield of two bushels of fine onions from a single small sample packet of seed, while another customer raised a bulb fifteen inches in circumference and twenty-one and a half

ounces in weight. Others stated that it produced "the finest onions they had ever grown in a single season from seed." Per lb. \$1.10; 10 lbs. or more at \$1.00 per lb.

## Long-Keeping AUSTRALIAN BROWN ONION,— Per lb. 70 cts.; 10 lbs. or more at 65 cts. per lb.

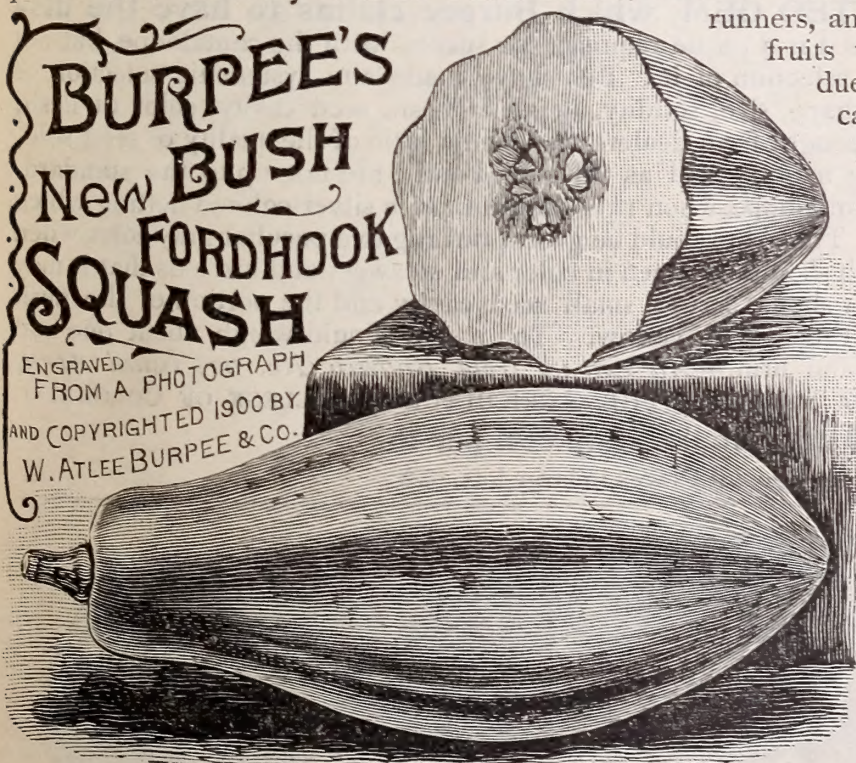

## Burpee's New "BUSH FORDHOOK" Squash.

This splendid novelty has been tested thoroughly for two years both in stiff loamy soil at FORDHOOK FARMS and in the light sandy soil of our South Jersey Trial Grounds. At FORDHOOK all the plants were uniformly of **true bush habit**, while in South Jersey only a few developed slight runners, and these did not appear until after the fruits were well set; they were doubtless due to continued wet weather. In each case these "BUSH FORDHOOKS" were

planted in rows four feet apart and were cultivated without difficulty, both ways, throughout the season. The growth is a marked contrast to the original running type of *Fordhook Squash*, which requires considerable room in which to run, consequently this new bush variety will prove **more productive**. Two plants can grow in a hill; each plant will produce *at least five or six fine squashes*. The fruits are a little shorter than those of the original *Fordhook*, but are thicker through, so that they are equally as desirable, both for summer and winter use. We did not find that it was quite so early as our strain of *Early*

*White Bush or Pattypan*,—being about a week later,—but the *exceptionally fine quality* and rich sweet flavor more than compensate for this slightly later fruiting. Probably in a cooler location the new "BUSH FORDHOOK" would prove fully as early as the *Pattypan*. Like the original *Fordhook Squash*, this new Bush type is **unequaled in quality** and delicious sweetness by any other variety either for summer or winter use. The young tender fruits can be sliced and fried or prepared as other early varieties for summer use, while the ripened fruits can be gathered just before frost and stored in a warm dry place for winter. They will keep in fine condition until the new crop is ready. *Now first offered to the trade.* Price of **Electro** (with order for seed), \$1.25.

Per lb. \$1.35; 10 lbs. or more at \$1.25 per lb.

BURPEE'S NETTED GEM MELONS,—grown at Rocky Ford, Colorado.

## Burpee's NETTED GEM ("Rocky Ford") Melon

Introduced by us twenty-two years ago, this is the famous variety that has made Colorado celebrated for its luscious "ROCKY FORD" Melons.

The Arkansas Valley of Colorado has for some years been famous for its cantaloupes. During the season of 1900, 780 cars were shipped, which represents the product from about 2500 acres. The cantaloupe is known as the "ROCKY FORD," from the town that has led in the industry. **The variety grown is the NETTED GEM, which Burpee claims to have the distinction of originating.** Good seed is a prime requisite for success with the cantaloupe, but not enough attention has been paid to the selection of it. Few have made any systematic selection of

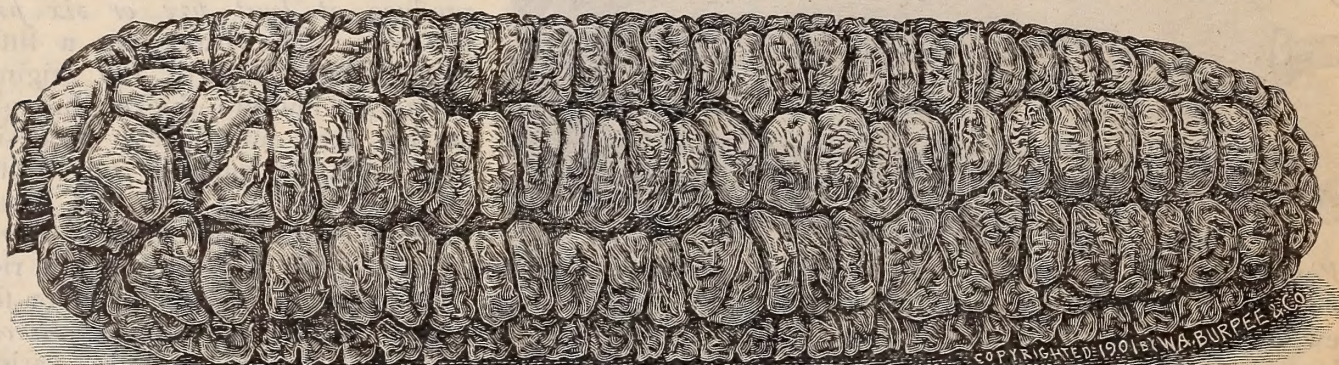

seed, looking well to the shape, size, solidity, depth of flesh, seed cavity, color of flesh, and quality. Many have bought from dealers who knew little of the quality of seed sold, and the result is that many melons sold as "Rocky Ford" are not up to the standard.

A pure Rocky Ford cantaloupe when ripe should have a silver-colored netting which is lace-like in appearance. The skin should be green, turning to a peculiar gray color when the melon is fit for shipping. The flesh should be green in color and so sweet and luscious that it may be eaten close to the rind. The melon should have a small seed cavity and the portion of the flesh immediately surrounding it be slightly tinged with yellow. The melon should weigh about one and one-half pounds and be very solid and firm.—An extract from Bulletin No. 62, issued April, 1901, by The Agricultural Experiment Station of THE AGRICULTURAL COLLEGE OF COLORADO

**Per lb. 70 cts.; 10 lbs. at 65 cts. per lb.**

## Early Sweet Corn,—Burpee's "GOLDEN BANTAM."

Now first offered to the trade,—for description, see Retail Catalogue.

# Chinese Giant—"is Giant Indeed."

Electro \$1.50,—with order for seed.

L. G. CLUTE, Greeley, Del. Co., Iowa, October 16, 1900, writes:—"In the large number of varieties (nearly 100) grown from your seed not one of them was a failure. Not only was the stand perfect, but the vegetables were perfect also. The tomatoes were the wonder of all who saw them. The BURPEE'S ALLHEAD EARLY CABBAGE took the lead of everything I ever saw. I took first premium at Iowa State Fair on specimens weighing thirty-eight pounds dressed ready for cooking. They were the largest early cabbages I ever saw. My ONIONS were simply immense. I took first premium on White, Yellow, and Red; also first on Collection."

AUSTRALIAN BROWN ONION deserves special mention; no Onion at our State Fair attracted so much attention. The Onion Show was the largest and finest ever shown at the Iowa State Fair. . . . CHINESE GIANT PEPPER is giant indeed, some measuring fifteen inches around them. They are the finest shaped pepper for stuffing I ever grew. I had twenty-two large fruits on one vine at one time; not one less than twelve inches around. I want to say to you that as long as L. G. CLUTE lives, I shall buy from W. ATLEE BURPEE & Co., and try to get all of my friends to buy of you also."

BURPEE'S MAMMOTH "CHINESE GIANT" PEPPER. Hardly one-third Natural Size,—from a Photograph.

## An Expert Opinion of The Burpee System.

HERBERT MYRICK, ESQ., President of The Orange Judd Company, of New York, and also of The Phelps Publishing Company, after a visit to FORDHOOK, wrote:

"Seedsmen would not be so often blamed if more of them conducted their business along the lines adopted by Burpee. And farmers would be less prone to complain of seed if they would visit the leading testing grounds and seed farms. At Fordhook, for instance, we find Mr. Burpee testing more than 6000 varieties of plants and flowers. Only about one-third this number may finally go into his catalogue, but the tests enable him to sift the good from the poor, both from seed of his own production or that is grown for him by experts under contract. How important such tests are is realized more by the market gardener and florist than by many farmers. . . . There are scalawags in every trade, but American agriculture in all its branches owes most of its improved fruits, vegetables, and flowers to the men who have honored the seed and florists' trades."—*Editorial from the AMERICAN AGRICULTURIST, New York, September 19, 1899.*

## Caution!

Beware of the cheaper Bull Nose or Ruby King Pepper seed being sold as Chinese Giant. We notice that a European dealer is offering so-called Chinese Giant Pepper Seed to the American trade at fifty cents per pound! Some dealers, not knowing how few seeds each of these gigantic fruits contain, may import this cheap seed for sale to their customers,—paying much less per pound than the genuine seed is worth per ounce!

## New Red Pepper, "CHINESE GIANT"

Double the Size of Burpee's Ruby King and Equally as Mild.

**This is the largest and finest mild red pepper.** Truckers planting for market will find BURPEE'S "CHINESE GIANT" the most profitable variety they ever handled. Not only is it early in ripening and immensely productive for so large a pepper, but its enormous size will cause it to sell most readily. The plants are vigorous in growth, but of stocky habit, seldom more than two feet in height. They are well branched and thickly set with enormous fruits, which appear to hang in clusters,—so many being set on the comparatively small plants. Frequently half a dozen fruits will touch each other, as if in a single bunch; the strong growth of the plants and abundant foliage enable them to mature the large number of fruits nearly as early as the popular *Burpee's Ruby King*. The monstrous fruits are of thick blocky form and of most brilliant glossy scarlet. They grow four to five inches broad at the top and are of equal length, divided into four or more large ridges; when ripe they are indented at the blossom end.

The first fruits set in a cluster of three to five at base of the plant, and are generally longer than those setting later on the upper branches, although the later fruits are equally as broad. All are **uniformly of most "enormous" size.** The flesh is unusually thick and extremely mild,—**as sweet as an apple;** it makes an excellent salad sliced and served like tomatoes. The enormous fruits yield so little seed that the genuine seed must be always high in price.

Wholesale, 60 cts. per oz.; \$6.50 per lb.

## "A Veritable Monster Among Peppers."

addition to summer salads, as the flesh is thick, tender, and sweet, without any of the burning pungency often found in the older varieties. The plants grow finely, and the immense peppers, often more than six inches in diameter and depth, make a very handsome show in the garden. The Chinese Giant is somewhat earlier than the popular Ruby King pepper, and seems to be fully as productive, if bulk be taken into consideration.—*An unsolicited editorial in THE RURAL NEW YORKER, New York, October 6, 1900.*

CHINESE GIANT PEPPER.—W. Atlee Burpee & Co., Philadelphia, Pa., sent us some seeds of this veritable monster among peppers for trial last spring. We have grown them with much pleasure, and find the gigantic and highly colored fruits a pleasant

BURPEE'S FORDHOOK WHITE SPINE CUCUMBER,—accurately engraved from a Photograph.

# Burpee's Seeds Grow!

THE ONION here shown is engraved exactly natural size from photograph taken by ourselves; of a specimen grown by one of our customers in New York. It shows what our strain of PRIZE-TAKER will produce the first year from seed,—even in the Atlantic States. We have a fine lot of new seed,—write for prices if in need of a large lot.
